WORK EXPERIENCE

Software Engineer

Freelance(Remote)

March 2023 - April 2023 / City, Country

- Developed and implemented new features for a web application using Python and Django framework.
- Collaborated with the team to optimize the application's database queries, resulting in a 20% reduction in response time.
- Conducted code reviews and provided constructive feedback to junior developers, improving overall code quality.
- Assisted in troubleshooting and resolving technical issues reported by users, ensuring high customer satisfaction.

Software Engineer

Freelance(Remote)

September 2022 - October 2022 / Washington, DC

- Worked on a cross-functional team to refactor and optimize legacy codebase for a mobile app using Python and Django.
- Implemented unit tests, increasing test coverage by 30% and improving overall software quality.
- Collaborated with UX designers to improve the app's user interface and enhance the overall user experience.
- Participated in daily stand-up meetings and provided regular progress updates to the team.

Software Engineer Remote Intern

CandyWriter LLC

June 2022 - August 2022 / Pittsburgh, PA

- Assisted the development team in creating new features and improving the user interface of the BitLife mobile game.
- Conducted quality assurance testing to identify and report bugs and inconsistencies in the gameplay and user experience.

HACKATHONS

- A2SV Generative AI Hackathon Quarter-Finalist

- Built a simple website and utilized open-source machine learning models

- PicoCTF 2022 Competition Top 400

- Solved most of the Web and Binary exploitation challenges.
